

Description

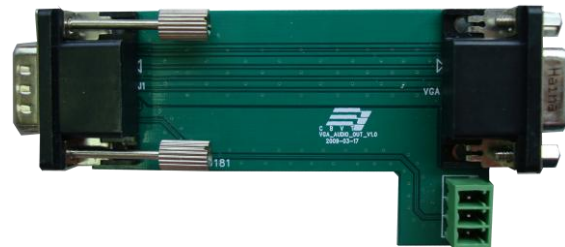

MVS- WUXGA is a high-quality output module which provides one HDMI and one VGA output. It also provides a HDMI input channel which can be used for connecting a computer for monitoring purpose. The output resolution is up to 1080x1200. The VGA port, if worked with a mini insert module, will give the customer a VGA output and an audio output. Customer can use any WEB browser in a PC to remote control the unit through a 1000/100M Ethernet port.
